FASTER - CLEANER - EASIER - AFFORDABLE

You can spray apply professional quality bedliners using our Qwik Spray System without investing all the money for expensive machinery. The Qwik Spray System will increase your productivity while significantly reducing the labor costs associated with set-up and clean-up. Our high performance bedliners come supplied in cartridges, meaning your valuable time is not spent pre-mixing material or involved in equipment clean-up since most parts are disposable.

The portability of the VFI-Qwik Spray System will increase business by allowing you to spray at alternate sites. The spray system will also provide excellent speed of application, control of your film thickness and transfer efficiency resulting in minimal material waste.

Gun Description:

The VFI-Qwik Spray System is easier to operate than any spray system you are currently using or considering to purchase, so simple and easy that no special training is required. When you purchase the Qwik Spray System you are provided with the complete equipment package reducing the cost of special or extra equipment, (air supply not included).

Product Description:

VFI-544 is a 100% solids, two-component polyurea aromatic coating available in black. We also offer a polyurea aliphatic coating available in several colors. VFI-344 is UV-stable, and is a 100% solids, two-component coating. These products are environmentally safe and contain no VOC's, are easily textured, as well as, chemically and corrosion resistant and can withstand extreme temperatures. The Qwik Spray System and spray applied material is also ideal for maintenance and repair of bedliners, as well as other projects.

VFI-544 and VFI-344 are sold in cases, consisting of 6 kits; each kit contains 1500 ml of material. This will cover 100 sq ft with 38 mil of coating. Included with each kit is a static mixer with an air atomizing tip.
