## **Volatile Free, Inc. announces new “How to” Video featuring SEALGUARD VFI-990 SILICONE.**

Brookfield, WI (**November, 2016**) –Volatile Free, Inc. (VFI®) partnered with A&Z Roofing to launch a “How to” video. The footage shows in depth interviews about the benefits of using a silicone coating and how to apply *SEALGUARD* VFI-990 SILICONE to a single-ply roof. The video also features fantastic aerial shots as well as time lapse footage.

Angelo Zerbo, President of A&Z Roofing, used the VFI recommended three step process. First, cleaning the roof with VFI-1009 Cleaning Concentrate. Second, priming the roof with VFI-#11 Epoxy Primer and third, coating the roof with *SEALGUARD* VFI-990 SILICONE.

“This footage shows our silicone system at its very best and we are truly proud to be part of a project of this caliber,” says VFI® President, Nancy Hochmuth.

Volatile Free, Inc. has been in business for over 20 years, manufacturing high performance polymers. Since 1995, VFI has successfully manufactured polyurea and polyurea hybrid products, and has remained strong in the industrial and commercial roof coating industry, while branching into more OEM markets. VFI’s success is due to the strong relationships they have built while maintaining and improving their products.

To learn more about VFI’s new and certified products visit [www.volatilefree.com](http://www.volatilefree.com). To place an order call (800)-307-9218. Visit Volatile Free, Inc. at the SPFA and International Roofing Expo next year!
