VFI[®]-695 Clear Wall Sealer/Water-repellent

VFI-695 is a clear sealer/water-repellent intended for use on bare brick, and stone walls. It provides a durable, clear protective barrier against water and dirt. VFI-695 will resist the growth of biological matter due to its ability to shed water and dirt. Because it does not create a film, VFI-695 allows the wall to have excellent breathability.

VFI-695 ADVANTAGES

- **Easy application** with no special tools necessary
- **No film build or gloss** means that VFI-695 can prevent water intrusion without changing the appearance of brick and stone walls
- **Reduces efflorescence and biological growth**
- **Allows the wall to “breathe”**, so that existing moisture can pass through
